

## Seminars at Wilhelminenberg SS2026! Welcome to our seminar series!

Students participating either in person or online can earn academic credits by enrolling in the course KV 128 804, "Ausgewählte Themen der Wildtierökologie". Please check additional information for participation at Vetucation platform. Don't miss this opportunity to deepen your knowledge and gain valuable credits!

Participation for **non-enrolled students and other guests**: please request a link to the video conference by sending an email to [klivv@vetmeduni.ac.at](mailto:klivv@vetmeduni.ac.at)

**Seminars will be held in person in a lecture hall at the Research Institute of Wildlife Ecology, Savoyenstr. 1, 1160 Vienna.**

**The seminar starts at 14:00/2 p.m. (CET)**

<b>MARCH</b>		04.03.	THOMAS ALBRECHT	Charles University, Faculty of Science, Prague Institute of Vertebrate Biology, Czech Academy of Sciences, Brno, CZ	After mating: extrapair paternity and postcopulatory sexual selection in birds
		11.03.	SONJA HARTNACK	Clinical Department of Farm Animals and Food System Transformation, Center of Veterinary Public Health and One Health, University of Veterinary Medicine, Vienna, AT	Rabies Control in Uganda through a One Health Framework
		25.03.	JUDITH JANISCH	Centre of the Advanced Study of Collective Behaviour (CASCB), University of Konstanz and the MPI-AB, Development and Evolution of Cognition Group, Konstanz, DE	Influence of Substrate Variation on Kinematics and Performance in Wild Primate Locomotion
<b>APRIL</b>		08.04.	KAJA WIERUCKA	Behavioral Ecology and Sociobiology Unit German Primate Center – Leibniz Institute for Primate Research, DE	Embracing complexity: integrating new technologies, cue diversity and social contexts in the study of animal communication
		15.04.	BEATRIZ VICOSO	Institute of Science and Technology Austria (ISTA), AT	<i>To be announced</i>
		22.04.	MARIO PESENDORFER	BOKU University, Institute of Forest Ecology, Department of Ecosystem Management, Climate and Biodiversity, Vienna, AT	Food-hoarding corvids: friend or foe?
		29.04.	RUDY BROGI	Department of Veterinary Medicine of the University of Sassari, IT	Behaviour under constraint: how mammals balance multiple pressures in a changing world
<b>MAY</b>		06.05.	SONIA KLEINDORFER	Department für Verhaltens- und Kognitionsbiologie, Core Facility KLF für Verhaltens- und Kognitionsbiologie, Universität Wien, AT	Behavioral Innovation in Darwin's Finches
		20.05.	CARLOS ADRIAN GARCIA-RODRIGUEZ	Division of Bioinvasions, Global Change and Macroecology, Department of Botany and Biodiversity Research, University of Vienna, AT	Exploring the past, present and future of biodiversity from the intersection of ecology and evolution
		27.05.	CHRISTIAN DÜRNBERGER	Unit "Ethics and Human-Animal Studies", Messerli Research Institute, University of Veterinary Medicine, Vienna, AT	(Empirical) Ethics and Wildlife
<b>JUNE</b>		10.06.	DAVID MACDONALD	David Macdonald's Lab, Department of Zoology, University of Oxford, UK	The Badgers of Wytham Woods: two paradoxes, a state change, and a perplexing puzzle
		17.06.	HANNAH ROWLAND	Senior Lecturer in Ecology Evolution, Ecology & Behaviour, Institute of Infection, Veterinary & Ecological Sciences, University of Liverpool, UK	Chemically Mediated Interactions between Predators and Prey
		24.06.	CHARLOTTE CHRISTENSEN	University of Zurich, Department of Evolutionary Biology and Environmental Studies, Zurich, CH	Behaviour to the rescue in the Anthropocene?

**Konrad Lorenz Institute of Ethology, 1160 Vienna, Savoyenstr. 1**

**Research Institute of Wildlife Ecology, 1160 Vienna, Savoyenstr. 1**
