

# MASTER'S PROJECT IN BEHAVIOURAL BIOLOGY

Our research group, located at the Konrad-Lorenz-Institute of Ethology (Savoyenstraße 1, 1160), is looking for students who would like to do their master thesis in the field of behavioural biology.

The student's work will be part of our current FWF-project on the role of ultrasonic vocalizations in sexual selection of wild house mice (*Mus musculus musculus*).
