

4th INTERNATIONAL WORKSHOP
within APM NAWA project ScienceNet

**Spermatozoa Function
and Conservation in Large
and Small Animals**

ONLINE: JULY 22ND 2022 / FREE REGISTRATION

MAIN TOPICS

The main topic of the 4th International workshop within the NAWA APM Project ScienceNet will be spermatology in large and small animals.

As in previous workshop, both scientists and practitioners as well as students will profit from the informative lectures. Discussed will be development, function and conservation of epididymal sperm, spermatozoa membrane function and modern conservation techniques, diagnostic tools for fresh and frozen sperm. The workshop will be held online and the participation is free.
